HOMEPAGE
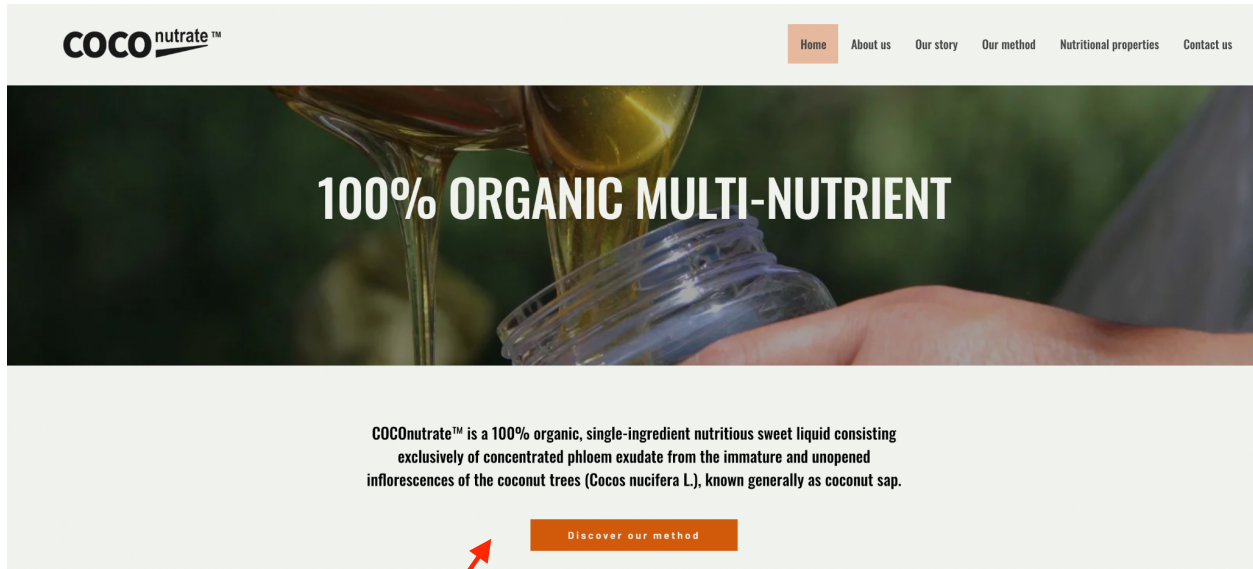

Revert back to the [original design](#) I made of the homepage:
- Change picture
- Take away shadow and typography animation on title

Add this back the way it was

Go back to this color scheme

Change design to the above
- When hovering over the icon, the icon and category title changes color. The function of this section should otherwise remain the same as the current website.

ABOUT US
Change design to this

OUR INNOVATION
Change design to this

OUR METHOD
Change design back to the previous option that had the icons + include hover/pop up with the copy for that step
once this is done, I will tweak the design slightly for the top of the page (title/image)

NUTRITIONAL PROPERTIES
- Change title at top of the page from Nutritional Values to Nutritional Properties
- Design otherwise stays the same

General notes:
- Make sure the orange color everywhere is this darker orange and not the bright orange that's currently being used on the website.
- Make sure font sizing, color and font style is the same as in my design
